- Fall 2024, 2023 & Spring 2022 Dean's List

- Relevant Courses

o Intro to Business Analytics, Database Management Systems, Python for Business Analytics, Data Mining, Big Data, ERP Systems, Business Programming, Forecasting Models, Intro to Operations Management, International Business, Calculus 1&2, Quantitative Methods, Statistics for Business, Financial & Managerial Accounting

PRACTICAL EXPERIENCE

Northrop Grumman Space Systems Dulles, VA

Pricing & Estimating Intern June 2024-August 2024

- Reviewed Northrop Grumman Space Basis of Estimates (BOE's) for accuracy & compliance with sector policy

- Worked as part of an Agile Scrum Team creating a python-based Cost Volume (CV) Generator tool intended for use by the entire Space Sector. The tool automates CV creation and assures DFARS compliance.

- Analyzed Sector BOE metrics through data visualization in Tableau. The task involved visual analysis of BOE Quality, Revenue, and Headcount per analyst.

- Independently developed Pricing & Estimating training using Adobe Captivate. The animated training is used for onboarding Pricing & Estimating personnel throughout Space Sector.

Pampco Passaic, NJ

Data Analytics Assistant June 2023-August 2023

- Streamlined rebate management by aggregating critical data from a multitude of vendors into a single, comprehensive report, enhancing information accessibility and efficiency.

- Enhanced product catalog integration by cleaning and standardizing data using Excel

Data Analytics Intern June 2022-August 2022

- Compiled company's financial data across multi-year reports

- Performed a comparative analysis of the financial data as compared to public and private competitors

- Used Excel to create a comprehensive spreadsheet for use in creating data visualizations for an annual report

SKILLS

- Python (Pandas, NumPy, SpaCy), SQL, VBA, Pivot Tables, Bash, PowerShell, Git, MS Access

- K-nearest-neighbors, Cluster Analysis, Decision Tree, Linear Optimization Techniques (Excel Solver)

- ARIMA modeling, Regression modeling, System Reliability Analysis
